

NAMAN THAKKAR

MERN Stack Developer

Ahmedabad, Gujarat, India | 9327524970 | [Email](#) | [GitHub](#) | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Information Technology Engineering graduate and MERN Stack Developer with hands-on experience designing and shipping full-stack web applications. Skilled in building scalable REST APIs, secure authentication systems, and real-time features with Node.js, Express.js, React.js, and MongoDB. Comfortable owning a feature end-to-end, from database schema to deployed UI, with a focus on backend architecture, performance, and clean engineering practices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, React Router, Redux Toolkit, TanStack Query, Vite, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization, JWT, Cookies, Sessions

Databases: MongoDB, MySQL, Redis

Tools & Platforms: Git, GitHub, Docker, Nginx, Socket.IO, Razorpay, Postman

EXPERIENCE

Vedshil Technologies

Gandhinagar, Gujarat, India

Software Developer Trainee (Apprenticeship)

Jan 2025 – Present

- Built and maintained full-stack web applications using React.js, Node.js, Express.js, and MongoDB, delivering features across the entire stack.
- Designed and integrated RESTful APIs connecting frontend interfaces with backend services and third-party systems.
- Implemented JWT-based authentication and role-based access control to secure application endpoints.
- Built reusable, responsive UI components in React.js and collaborated within Git/GitHub workflows to debug, test, and optimize application performance.

PROJECTS

VoltPlugEV

React.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO, Razorpay, Docker

- Architected a full-stack EV charging station booking and navigation platform with role-based access for users, station masters, and admins.
- Engineered RESTful APIs and authorization middleware to manage station discovery, real-time availability, and end-to-end booking lifecycle.
- Integrated Socket.IO for real-time booking updates and Razorpay for payments, including a commission-based revenue distribution workflow.
- Implemented interactive map-based station discovery with Leaflet Maps and containerized the application with Docker for consistent deployment.

PostGen AI

React.js, Node.js, Express.js, MongoDB, Redis

- Built an AI-powered LinkedIn content generation platform with authenticated, multi-user workspace management.
- Designed a scalable REST API architecture and reusable backend services to support content generation workflows.
- Implemented Redis caching to reduce redundant requests, improving response times for repeated content generation.

AI Grammar Assistant

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack writing assistant delivering real-time grammar correction, sentence refinement, and content rewriting.
- Designed reusable backend APIs to handle text analysis and content enhancement requests efficiently.
- Built a responsive React interface providing real-time feedback as users edit content.

Plant Analyzer

Node.js, Express.js, Multer, PDFKit

- Built a backend-driven plant health analysis platform supporting image uploads, automated diagnostics, and downloadable reports.
- Designed a file processing pipeline using Multer to handle image uploads and trigger diagnostic workflows.
- Implemented automated PDF report generation using PDFKit to structure diagnostic results into downloadable documents.

EDUCATION

Kalol Institute of Technology & Research Centre (GTU)

Kalol, Gujarat, India

Bachelor of Engineering in Information Technology — CGPA: 9.02

2022-2026

ACHIEVEMENTS

- Devang Mehta IT Award 2025 — Awarded as the Top Ranker of the College for outstanding academic performance and technical excellence.
